

## Changing the Directory where the License File is saved

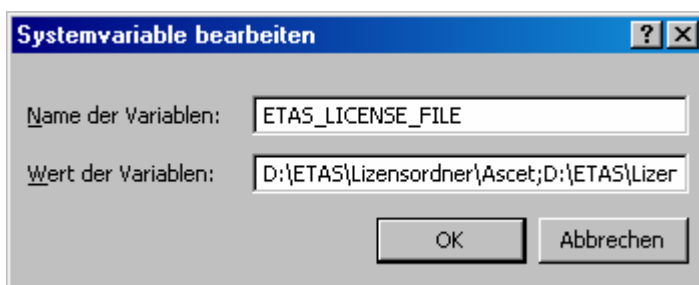

### DESIRED ACTION

Users of INTECRIO and ASCET 5 (from ASCET V5.1) need license files to use the software. These files are saved to a directory on the hard drive that is selectable during software installation. Is it possible to change this directory after installation?

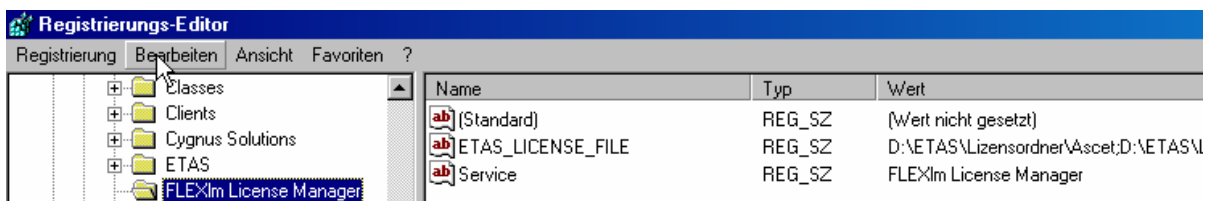

### SOLUTION

Users can freely choose the directory to which a license file is to be saved. However, it should never be stored in the installation directories of ASCET or INTECRIO, because the license would be deleted if the software were to be uninstalled.

The license directory settings are available in the **System Options** under the **Variable** ETAS\_LICENSE\_FILE.

In the registry, the license file directory can be set under HKEY\_LOCAL\_MACHINE -> SOFTWARE -> FLEXIm License Manager -> ETAS\_LICENSE\_FILE.

### APPLIES TO PRODUCTS

ASCET, INTECRIO
