

How can I switch the INCA/ETAS language settings

Question:

How can I switch the INCA/ETAS language settings in a Windows7/64bit system?

- a) for an already registered user
- b) for newly created users (admin privileges required)

Answer:

A registry setting has to be adapted

- a) for an already registered user

Important: Close all ETAS Software.

In order to change the language for an already **registered** INCA/ETAS user the string shown below can be used (provided that the language is supported by the operating system of the PC).

For Windows 32bit operating systems use the same key

Copy the appropriate string into the Windows command line:

Chinese:

```
reg add HKEY_CURRENT_USER\Software\ETAS\General /v Language /d Chinese
```

English:

```
reg add HKEY_CURRENT_USER\Software\ETAS\General /v Language /d EnglishUS
```

French:

```
reg add HKEY_CURRENT_USER\Software\ETAS\General /v Language /d French
```

German:

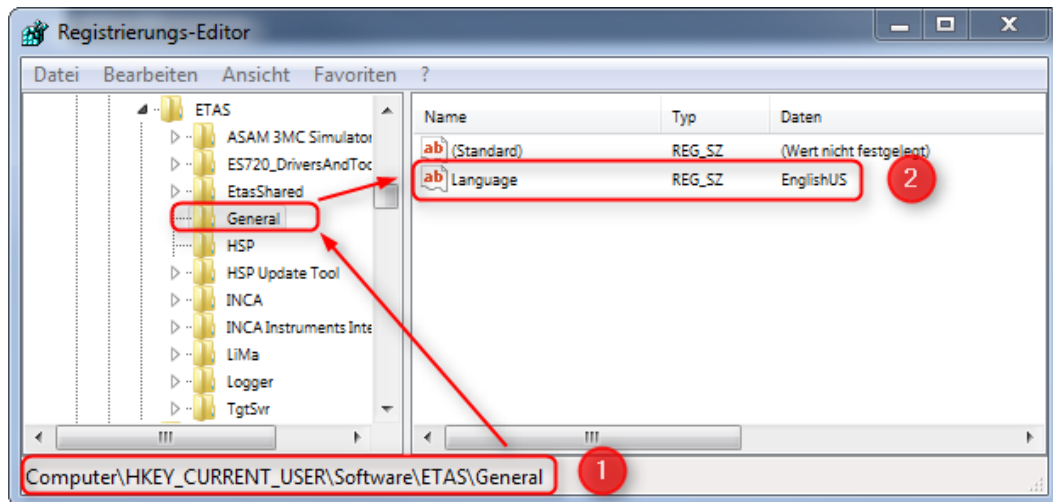

```
reg add HKEY_CURRENT_USER\Software\ETAS\General /v Language /d German
```

The registry modification only applies for the above mentioned languages. The Japanese version requires a Japanese

installation.

With Regedit.exe:

For example, switching to the English version results in this setting:

For Windows 32bit operating systems the registry setting is available in:

`Computer\HKEY_CURRENT_USER\Software\ETAS\General`

b) for newly created users (admin privileges required)

Important: Close all ETAS Software.

Administrator privileges are required.

In order to set the language for any **future** INCA/ETAS user to be created the string shown below can be used (provided that the language is supported by the operating system of the PC).

Copy the appropriate string into the Windows command line:

Chinese:

```
reg add HKEY_LOCAL_MACHINE\SOFTWARE\Wow6432Node\ETAS\General /v Language /d Chinese
```

English:

```
reg add HKEY_LOCAL_MACHINE\SOFTWARE\Wow6432Node\ETAS\General /v Language /d EnglishUS
```

French:

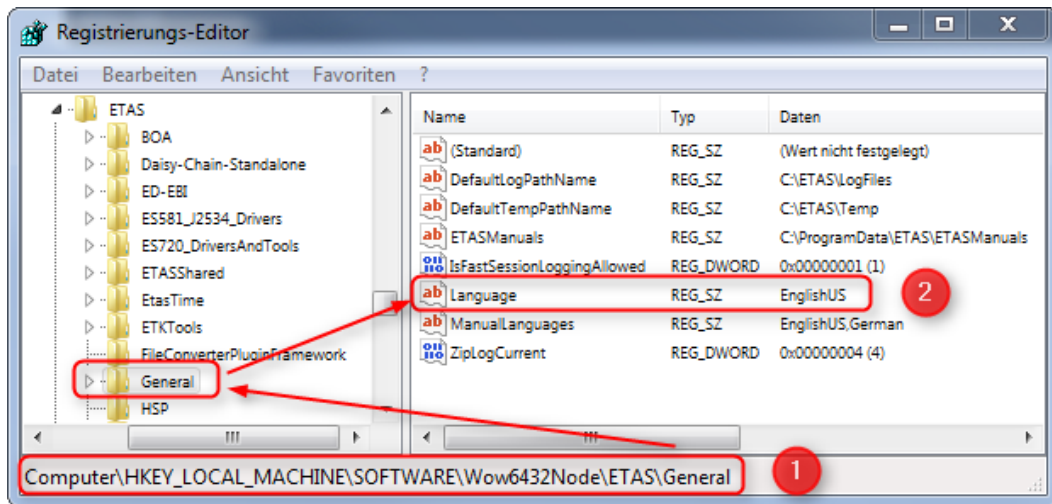

```
reg add HKEY_LOCAL_MACHINE\SOFTWARE\Wow6432Node\ETAS\General /v Language /d French
```

German:

```
reg add HKEY_LOCAL_MACHINE\SOFTWARE\Wow6432Node\ETAS\General /v Language /d German
```

With Regedit.exe:

For example, switching to the English version for new users results in this setting:

For Windows 32bit operating systems the registry setting is available in:

HKEY_LOCAL_MACHINE\SOFTWARE\ETAS\General

Additional information:

Note:

Changing the language setting applies to all ETAS Software (INCA, MDA, Hardware Service Pack, ...).
